Scope

The Winterschool will provide a platform for reviewing and discussing new developments in the field of electronic properties of molecular nanostructures and their applications.

Subjects included are:

- **Materials science of graphene and nanoribbons**
- **Carbon nanotube optics and electronics**
- **Carbon nanotube growth and selection**
- **Single-molecule experiments**
- **Applications of molecular nanostructures**
- **Theory of molecular nanostructures**
- **Biomolecule physics and applications**
- **Nanostructure spintronics**

Theoretical and experimental contributions from research work in this new field of materials science are welcome.

Time and Location

The winterschool will be conducted from

March 06 to March 13, 2010

at the **HOTEL SONNALP** in Kirchberg / Tirol, Austria. All participants of the winterschool will be accommodated in the hotel or in nearby hotels/private houses. Dinner will be served for all participants at the hotel. The Hotel Sonnalp is a modern, Tyrolean style building with a very cosy atmosphere, a big lecture room and several special installations like indoor swimming pool, sauna, solarium, etc. for your recreation.

Some further information

Tutorial and research lectures and poster presentations will be scheduled for morning and evening sessions. The afternoon will be free for mini workshops, special tutorials, and private discussions.

A second announcement will be distributed to interested colleagues in October 2009. Personal application for participation will be required. Current information will be in the internet at:
